QNB Group Financials

Key data (as at 30 June 2014)

■ QNB ■ QNB incl. QNB ALAHLI (○) Contribution

- QNB Group finalised incorporation of the financial results of QNB ALAHLI during the Q2 FY13
- Results finalised under International Financial Reporting Standards (IFRS)
- Capital Adequacy (Basel III) on consolidation 15.9%

Economic Overview

Qatar has the world's highest hydrocarbon wealth per national

- Qatar has the world's highest state revenue per national
- Qatar has the world's highest hydrocarbon reserves per national

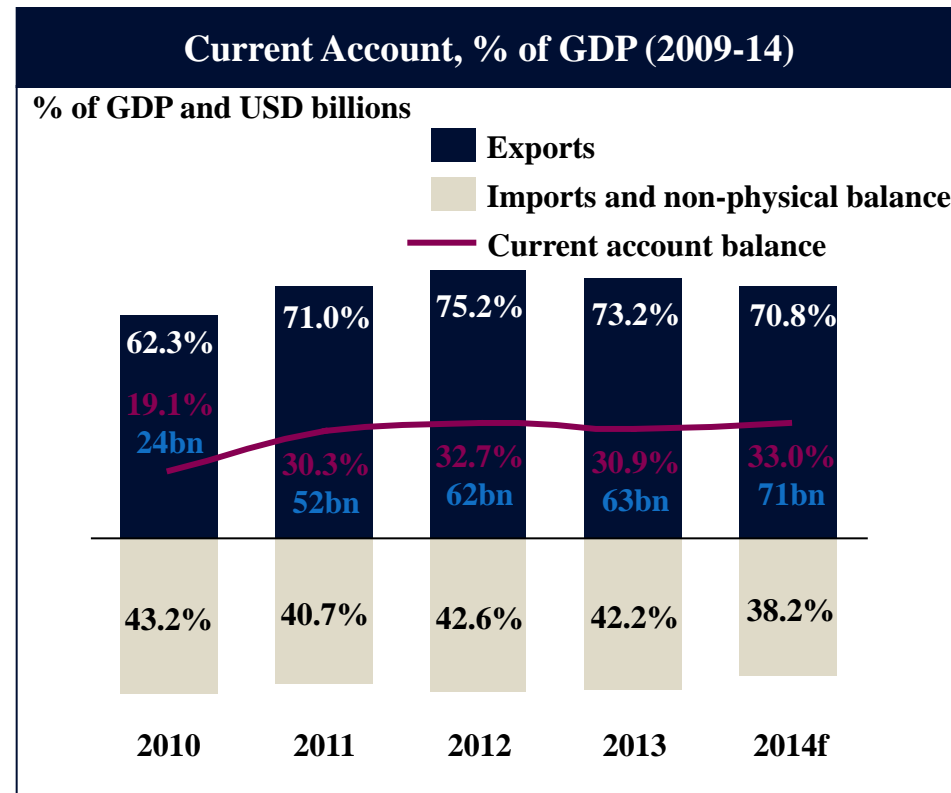

- Qatar's hydrocarbons reserves are mostly held in the North Field, which contains 59% of GCC gas reserves and 13% of global gas reserves
- Qatar could produce at 2012 levels for another 160 years
- Qatar has 24bn barrels of crude oil and condensate reserves (1.4% of global reserves)

The non-hydrocarbon sector will drive growth in the next few years

- Expansion plans in the oil and gas sector are now on hold and real hydrocarbon sector growth is expected to remain below 1% in 2014
- QNB Group expects the non-hydrocarbon sector to expand strongly, driving an acceleration in overall real GDP growth to 6.8% in 2014
- The share of the non-hydrocarbon sector in nominal GDP is forecast to rise from 46% in 2013 to 50% in 2014 as the economy becomes more diversified

Hydrocarbon receipts will continue to result in large fiscal and current account surpluses

- The budget for 2014/15 is based on conservative oil price assumptions (USD65/barrel)
- Higher infrastructure projects will drive government expenditure in the near term

- The current account surplus in 2014 will remain high on record export receipts
- With a strong current account surplus and lower capital inflows, international reserves will remain robust

Qatar banking sector is growing rapidly and remains highly profitable

- Assets saw a healthy expansion over the period 2009-13, growing by a compound annual growth rate (CAGR) of 18%
- Deposits grew strongly by a CAGR of 22% over 2009-13, underpinned by large fiscal surpluses and rapid population growth
- Loans grew by a CAGR of 21% over 2009-13 due to large project finance and growing consumer demand
- Average return on equity for the banking sector was estimated at 16.0% at end-2013
- Average non-performing loans remain low at 1.7% of total loans at end-2013

Qatar was the world's fastest growing economy during 2008-12

- Qatar's annual real growth of 12.0% during 2008-12 was the world's fastest, reflecting the expansion in LNG production
- Qatar's growth accelerated to 6.5% in 2013, from 6.2% in 2012

- GDP per capita (Purchasing Power Parity) was USD 100.9k in 2012, the highest globally
- Qatar had the highest percentage of millionaire households in the world (14.3%) in 2012

Growth has been driven by a dramatic expansion in gas production

- Gas production has increased 2x since 2008
- Only 19.7% of total gas was used domestically in 2012
- LNG production has reached planned capacity of 77m t/yr

- Rising production of condensates and natural gas liquids (NGLs) more than compensates for lower oil production
- At current production rates, oil reserves will last 39 years

Expansion has driven population growth and created significant wealth

- Population growth was the highest in the world in 2007-09, largely due to inflows of construction workers
- Population is expected to reach 2.2m in 2014 as the government ramps up its infrastructure investments in preparation for the 2022 World Cup

- GDP per capita has grown rapidly in recent years, becoming the highest in the world, but has fallen in 2013-14 owing to rapid population growth
- The outlook for economic growth is strong as the large hydrocarbon wealth is used to build a diversified economy

Growth in the non-hydrocarbon sector driven by increased investment spending

- Qatar's development is underpinned by an array of projects, which have been crucial to driving its economic growth in the last ten years
- Investment spending is set to pick up during 2013-18 in preparation for the 2022 World Cup

Inflation remains moderate notwithstanding a recovery in rents

- Rents account for about one third of the CPI basket and fell during 2009-12, turning inflation negative in 2009-10
- The influx of expatriate workers will put moderate pressure on domestic prices, adding to demand and driving up rent inflation
- QNB Group expects rents to continue rising at a moderate pace in the near term whilst non-rent inflation moderates, resulting in an uptick in inflation to 3.4% in 2014

Strong fundamentals have lowered CDS spreads

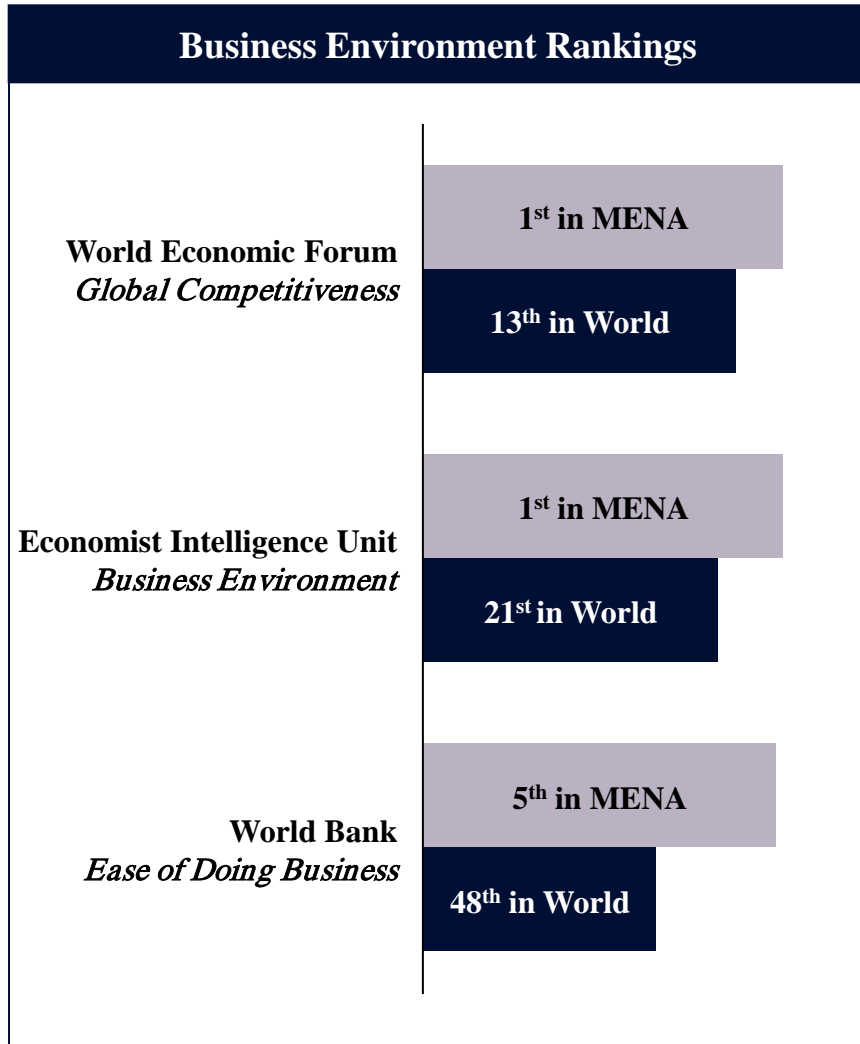

Qatar CDS Spread (Aug 2012 – Mar 2014)

Credit Default Swap spreads are the annual cost of insuring sovereign debt against default in basis points

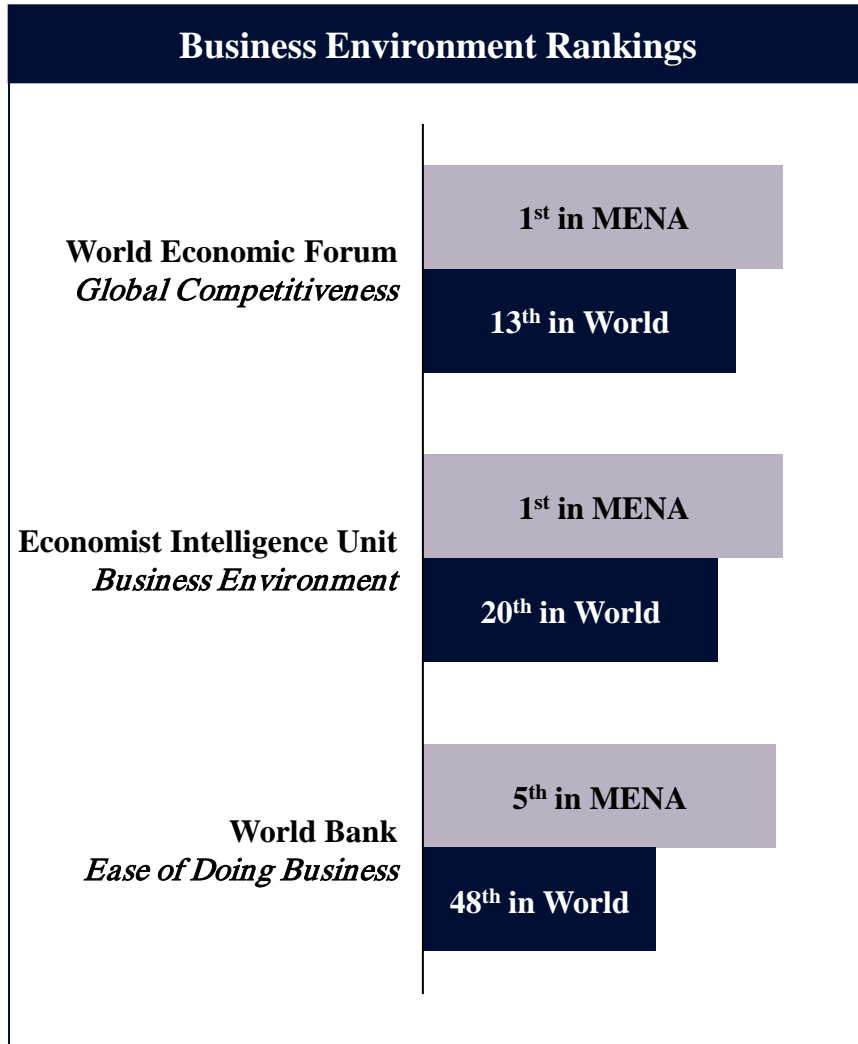

- Strong fiscal and economic fundamentals have reduced Qatar's Credit Default Swap (CDS) spread to historic lows
- Qatar's CDS spreads are amongst the lowest regionally as they are supported by the country's robust economic and resource-driven strengths as well as its strong fiscal and external balance sheets

Qatar's business environment is one of the strongest in the MENA region

- ### Contributing factors
- **Strong economic fundamentals**
 - Strong growth and successful focus on diversification
 - High levels of government spending and personal consumption
 - Enabling infrastructure (power, transport, telecoms etc.)
 - Strong banking system
 - Stability provided by the currency peg to US dollar
 - **Low tax environment**
 - Top 2 for taxes in most global rankings
 - Low corporate taxes, e.g. 10% on foreign company profits (ex-hydrocarbons sector)
 - No personal or employment taxes
 - No VAT, low import duties
 - **Enabling regulation and favorable business environment**
 - Flexible labor laws
 - Strong institutional framework, low level of corruption, high efficiency of government institutions and strong security
 - Innovative structures – e.g. Qatar Financial Centre

Qatar's business environment is one of the strongest in the MENA region

- ### Contributing factors
- **Strong economic fundamentals**
 - Strong growth and successful focus on diversification
 - High levels of government spending and personal consumption
 - Enabling infrastructure (power, transport, telecoms etc.)
 - Strong banking system
 - Stability provided by the currency peg to US dollar
 - **Low tax environment**
 - Top 2 for taxes in most global rankings
 - Low corporate taxes, e.g. 10% on foreign company profits (ex-hydrocarbons sector)
 - No personal or employment taxes
 - No VAT, low import duties
 - **Enabling regulation and favorable business environment**
 - Flexible labor laws
 - Strong institutional framework, low level of corruption, high efficiency of government institutions and strong security
 - Innovative structures – e.g. Qatar Financial Centre
